NET coder, I mostly rely on Software development while working on Java and C#, though I am not not up to speed on C# language. A: Don't know about Java, but in C# you can probably use Type.GetFields() and Type.GetField() to do this. You'd also have to use reflection, as you're doing in your code, but at least you wouldn't have to touch any Type classes. Contact Please fill in the form below to contact us. A FULL LIST OF OUR ONLINE CLASSES ARE AVAILABLE HERE ON OUR WEBSITE. YOU MAY PURCHASE A NUMBER OF SESSIONS AND RECEIVE A MONTHLY ONLINE UPDATE. ALL PORTIONS OF CLASSES ARE \$15 EACH. Looking for a company that can help you launch or re-launch your company in the current economy? We are here to assist you in putting together your sales and marketing strategy that will help you get your products and/or services to the next level. Click the button below to learn more about our service. Our Online Learning Philosophy Our learning approach is designed to help you grow as a result of making connections between the new learning and your current experiences. Understanding that the brain functions best when using a mixture of the L1 mode (or native) and L2 (or foreign) mind, we strive to maximize learning by keeping your brain in both modes. The longer you stay in the L2 mode, the more connections you build and, as a result, your ability to learn new things. In a similar manner, we assist our learners to learn new things by introducing multiple senses (visual, tactile, auditory, gustatory, olfactory), by guiding them into interactions with the learning and by providing a safe learning environment. Our key skill is being able to assist others in navigating a new and unfamiliar world – either by learning new things themselves, or by assisting them to learn new things. We believe 82157476af
